WELCOME FROM THE HEADTEACHER

It is my great pleasure to welcome you to Kendrick School. Kendrick is an 11-18 selective girls' school with academy status. It is a community of students and staff who work harmoniously and with respect to create a flourishing learning and caring community; our sixth form students are an essential part of our community.

Kendrick has an excellent school record of success across all areas of the curriculum and is regularly acknowledged as one of the very best state schools in the country. In its last five [OFSTED](#) inspections, Kendrick was judged an "outstanding" school. In our most recent inspection in November 2022, OFSTED stated "*Pupils and sixth formers are justly proud of their school community. They delight in their learning and truly excel here. One parent spoke for many when reflecting, 'The school does a great job of creating well-rounded, kind, human beings who will hopefully go on to make the world a better place. The academic results are important of course, but far from the only focus.'* Inspectors totally agree."

In the government's performance tables for this year, 2023, Kendrick School's Progress 8 score is +1.06, placing Kendrick in the top 2% of schools nationwide in terms of progress of students from KS2-KS4. A love of learning is at the heart of Kendrick with a strong emphasis on high quality teaching. Students are bright, enthusiastic, and curious and have a passion for learning. All staff are hardworking and dedicated to the school; teaching staff are experts in their field and are committed to achieving the best for their students. In the sixth form this can be seen in the excellent working and learning relationships between staff and students as well as the dedicated and committed pastoral support.

We offer a full and varied programme of A Levels which facilitate all students to pursue their studies at university. Most of our students apply to university and they are carefully supported through this process by experienced staff. As well as the formal curriculum, sixth form students are encouraged to take a lead in extracurricular education and activities and work cooperatively with younger students. The House system provides opportunities for healthy competition with numerous and varied annual House events. These events are often led and coordinated by the Kendrick Student Leadership Team and House Captains who work energetically with staff to support this vital community aspect of the school often referred to as the *Kendrick Community Spirit*. Our sixth form students are excellent role models to younger students, and they are encouraged to take on this responsibility as part of their personal development by integrating with students academically, as mentors or in community activities. I am very proud of our sixth form students, not only for what they contribute to Kendrick, but also for their skills and attributes. The education they receive, enables them to make good and meaningful life choices.

As the Headteacher of Kendrick, my vision is to **lead, inspire and make a difference to the lives of young people**. I believe passionately in girls' education and know that Kendrick School provides its students with the very best education there is. As a prospective sixth form student at Kendrick, you will have the opportunity to receive a high-quality education that will prepare you for university entrance. At the same time, you will be able to develop your personal, social and community skills to help you become a responsible and independent individual who will be able to make a positive contribution to society.

A handwritten signature in black ink that reads "C. Kattirtzi".

Ms Christine Kattirtzi
Headteacher

WELCOME FROM THE HEAD OF SIXTH FORM

We are extremely proud of the academic and personal achievements of all the students in our Sixth Form. Not only do the students enjoy impressive examination results that place us as one of the best state schools in the country, but they repeatedly amaze us with other individual talents and achievements, both at Regional and National level.

At Kendrick School we ensure breadth of opportunity for all students, with staff who offer a holistic education and stimulating experience both in and beyond the classroom.

Our Sixth Form is highly oversubscribed. There are approximately 150 students in each of Years 12 and 13, with approximately 50 external admissions each year. Form groups are vertical with a mix of Year 12 and 13 students in each, with a highly experienced Sixth Form Tutor Team, who provide exceptional pastoral care for every individual.

Kendrick School is committed to providing a flexible and personalised approach to examination entries for all students. Information, advice and guidance for all students enables them to choose the appropriate curriculum pathway and our three and four A-Level pathways are complemented by a programme of personal development, enrichment and physical education. Leadership and volunteering opportunities are plentiful and we expect students to become fully involved in this aspect of school life and become strong role models for the younger years.

We recognise that the world is a complex place to grow up in, with challenges coming from many angles and decisions to be made throughout sixth form life. Our Personal Development curriculum has a student-centred approach which responds to the changing needs of our cohort and enables the students to develop into well rounded individuals who are prepared to tackle successfully the futures they aspire to.

Students thrive in our highly academic environment and go on to access some of the most competitive university courses and degree apprenticeships in the country.

In summary, Kendrick School Sixth Form will provide the culture and environment where students will have the opportunity to work hard and develop a passion for their academic subjects. They will be able to develop as a learner, as well as an individual, achieving their potential and encouraged to flourish along every step of the way. We will nurture the potential of every young person through our broad and diverse curriculum and develop the engineers, lawyers, scientists, writers, artists, businesswomen and leaders of the future.

We very much encourage you to apply, so that you can experience the exciting opportunity of sixth form study at Kendrick School.

A handwritten signature in black ink, appearing to read 'G Hearn', written in a cursive style.

Mrs Gillian Hearn
Head of Sixth Form

A MESSAGE FROM THE KENDRICK STUDENT LEADERSHIP TEAM (KSLT)

It seems almost impossible to distil the essence of Sixth Form life at Kendrick into three words, but if we were to do so those three words would be **invigorating, insightful and inspiring**.

We, Kendrick Students, aspire to achieve excellence throughout everything we do, whether that be through various leadership roles or exploring the endless possibilities of our post-Kendrick futures. We are especially proud to represent one of the best academically achieving Sixth Forms in the country, and we hope that this information illustrates just a small taste of life at Kendrick. Kendrick has shaped us into

multifaceted individuals - eager to explore the world as both academically, and socially, intelligent young adults. Each Student Leader Committee has put together a few words below; we hope this will help you start to visualise your own future here.

Curriculum and Current Affairs Committee – Sneha

As a student who joined in Year 7, I can confidently say that Kendrick School provides each student with an abundance of support and opportunities to excel, and the Sixth Form is no exception. The framework for support here ensures that each and every student can progress and flourish, with drop-ins and individual sessions available with subject teachers. Furthermore, vertical tutoring across the sixth form creates a supportive environment where Year 12 students can receive advice from Year 13s.

There are plentiful chances to take on responsibility in the Sixth Form, through applying to be on the Student Leadership Team, mentor younger students, running clubs and being active members in our numerous clubs, such as eco committee! Furthermore, the multitude of clubs and societies run by students provide the chance to explore and develop your interests, as well as meet new people and make lasting friendships. I can guarantee that no matter your interests, there will be something for you here at Kendrick.

Student Wellbeing Committee – Ruthika

I can confidently say the nurturing and warm atmosphere at Kendrick School, created by supportive staff and peers, is unparalleled. No matter how big or small, there is an incredible Student Welfare Team, as well as counsellors, willing to listen to any issues you may be facing. The importance of talking about and looking after your mental health is emphasised and encouraged, without the fear of being judged by others and I believe this is pivotal to building the close-knit community we have for us all to thrive in, which allows us to flourish in whatever we choose to do. A-levels are challenging, but your teachers will ensure to make that transition as smooth as possible to make sure you don't feel overwhelmed by your work, through reasonable deadlines, drop-in sessions and positive classroom environments, allowing you to reach your full potential.

Community Committee – Riya

The most important thing about Kendrick's sixth form to me is the supportive and friendly community. The Sixth Form team encourages us to always do our best, with a focus on progress and improvement, but also value our mental health, regularly informing us of schemes like counselling and chat-lines as they understand A-levels can be a stressful time for many of us. The teachers also contribute to the amazing community here, as they are

always eager to help and answer questions, including hosting drop-in sessions to support you further. Along with the academic support at Kendrick, there is just so much to do here! There are a wide range of opportunities for all interests, such as student-led societies like Medicine society, Model UN, Art and so many others. As well as these, there are whole school clubs and events including musical ensembles, drama productions, Sports day, and fun fundraising events for charities, so there is always something to get involved in. At Kendrick you can not only achieve your full academic potential but also make lifelong friendships and memories.

House Committee – Rowena (on behalf of the Committee)

The House System is the heart of Kendrick School, with strong competition between Cedars, Palmer and Sidmouth. We try to help everyone make friends across year groups, learn new skills and get involved! Everyone is welcome (and highly encouraged!) to take part in House Events throughout their time at Kendrick. My personal favourite is House Drama, though Sports Day has grown on me given Palmer's win this year!

You can also earn House Tokens from your teachers for good work in lessons or from Ms Kattirtzi for a significant contribution to the school. Often, subject departments or teachers organise competitions separate to the House System for which the prizes are House Points so there are plenty of opportunities to support your house!

The Sixth Form is arguably the best time to get involved in house activities. You have an incomparable opportunity to act as a role model to younger students in the school by supporting your House Captains in leading events. For example, writing the script for House Drama. We know that Sixth Form life is busy but House Events are an amazing way to have fun whilst still contributing to your educational journey.

We wish you the best of luck for your futures and hope to see some of you at House Events in the Kendrick Sixth Form!

Our advice for Sixth Form would be to use the support offered to you, both by teachers and by your classmates around you. Take opportunities outside your comfort zone because it ends up being the chances you don't take that you regret. We wish you the best of luck on your Sixth Form journey and hope to see you at the activities and events taking place during the academic year.

THE SIXTH FORM AT KENDRICK

The academic offer for 2024-26 will provide opportunities for students to study three or four A-level courses, enriched with various opportunities for developing interests and skills outside the classroom. Students on the four A-Level pathway will have an opportunity to take one AS examination (if available), either at the end of Year 12 or Year 13, if this is considered appropriate following advice and guidance from the school or take all four subjects to A Level. Almost all students go on to excellent Higher Education establishments when they leave Kendrick and we believe our curriculum equips them for such opportunities.

At application, students will choose four subjects and begin to indicate their preference for a three or four A-Level programme of study. Through the advice and guidance provided at Consultation, appropriate decisions will begin to be made regarding the number of A-Levels the student will study and these decisions will be confirmed at Registration once the GCSE results are established. At all stages throughout the Sixth Form, we will advise and support students in their choices by careful and rigorous assessment as well as structured dialogue with students and their parents.

Curriculum Pathways

Year 12

Four A-Level Pathway

- 4 A-Level subjects
- Personal Development, Enrichment and Physical Education

Three A-Level Pathway

- 3 A-Level subjects
- Personal Development, Enrichment and Physical Education

In Term 4 the Extended Project Qualification will be launched and in Term 5 the AS Further Mathematics course will be launched and students will have the option to include these in their timetables. They may wish to consider their Curriculum Pathway plans for Year 13 at this time:

Year 13

Four A-Level Pathway

- 4 A-Level subjects (plus the EPQ in exceptional circumstances)
- Personal Development, Enrichment and Physical Education

Three A-Level Pathway

- 3 A-Level subjects (carrying on from Year 12 or having discontinued one subject after the AS examination or having decided to take one AS examination at the end of Year 13)
- The EPQ or AS Further Mathematics may also be taken
- Personal Development, Enrichment and Physical Education

In particular where the three A-Level pathway is chosen, it is expected that students will consider an opportunity to include additional elements to their timetable such as being a Pastoral or Departmental Prefect; outreach work with local schools; sporting or musical commitments; or undertaking a Massive Open Online Course (MOOC) in an area of particular interest. These opportunities are also available for students on the four A-Level Pathway but time will naturally be more limited.

A Levels

The following subjects are being offered at A Level in September 2024

Art & Design	Geography
Biology	German
Chemistry	History
Classical Civilisation	Latin
Computer Science	Mathematics
Drama and Theatre Studies	Music
Economics	Philosophy
English Literature	Physical Education
French	Physics
Further Mathematics	Sociology

In Year 13 we also offer the Extended Project Qualification (EPQ) and AS Further Mathematics.

It is important to note that some of these courses will only be available subject to staffing and student numbers.

Certain combinations of subjects are not possible and final decisions cannot be undertaken until the timetable and staffing are completed in June.

Volunteering is highly encouraged, and students have access to some of these opportunities through the school, but are also encouraged to make their own arrangements to give back to their communities. A focussed Personal Development programme is followed across Years 12 and 13: this is supported by a range of external speakers. One period a fortnight is also dedicated to joint enrichment activities between Year 12 and 13, designed to enhance the relationship and interactions between the two-year groups in a non-academic setting. By law, students in school Sixth Forms must follow a programme of Religious Issues and attend Assemblies.

A co-ordinated programme of advice on application to the wide variety of courses now available in Higher Education is given by the Heads of Sixth Form, Work Related Learning Coordinator, and Sixth Form tutors. We also fully support and help the students who opt to have a gap year, enter an Apprenticeship/Sponsored Degree Programme or go directly into employment.

Overall responsibility for the learning and welfare of all students in the Sixth Form lies with Mrs Hearn, the Head of Sixth Form and Mr Wilson and Mr Duncan, the Deputy Head's of Sixth Form.

On entry into Year 12 students are placed into a tutor group with a Form Tutor who will monitor their progress and help support students, settle into life in Kendrick School Sixth Form.

In Year 13 students are allocated a UCAS mentor – a member of staff dedicated to supporting them individually through the UCAS process and who will coordinate their reference. Support for applying to university is well-established and is outstanding.

SIXTH FORM LIFE AND OPPORTUNITIES

Voluntary Work, Work Experience, Prefect System and Physical Education

All students will volunteer to help in some capacity in school life and may use their time to assist departments as part of the Prefect system, depending on the demands of their chosen voluntary work. Many Sixth Form students are mentors to younger students in the school. They will also have the opportunity to take part in weekly physical education or do additional personal physical recreation activities or assist with activities with younger students. Most students want to take part in voluntary work in the local community which is arranged outside of school hours.

We encourage all students to give back to the school and the local and global communities as a demonstration of practical citizenship, and an additional benefit is that this can be mentioned in their Personal Statement or reference for UCAS. Some university courses, such as Medicine or Veterinary Science, would expect to see relevant work experience, such as helping in a care home. More details about the requirements of voluntary work for certain courses can be obtained from a member of the Sixth Form Team.

Students in the Sixth Form are encouraged to investigate work experience opportunities for themselves. The Work Related Learning co-ordinator also informs Sixth Form students of offers of work experience placements which are advertised and offered by our valued network of supporting businesses and contacts.

Kendrick Student Leaders

The Kendrick Student Leadership Team (KSLT) includes the Student Leaders and House Captains. These students undertake specific roles working with younger students in the school, organising and supporting inter year and inter House events in school. The Kendrick Student Leaders have an important role in representing the school at both in school and out of school events. They are excellent Ambassadors for the school.

House System

The three Houses at Kendrick are: **Cedars, Palmer, and Sidmouth** named after the buildings and benefactors of the school and Reading. There are an ever-increasing number of House events that take place over the year, these include: House Music, House Drama, House Sport, and House Quizzes. These events encourage students to integrate and work with other students from across the different year groups.

Clubs and Societies

There is a rich and varied programme of clubs and societies, often run by Sixth Form students. There is also an opportunity to set up any activity or club that is not currently available.

Musical Activities

Kendrick has a thriving music department with opportunities to learn a wide range of musical instruments. The department offer numerous choirs, ensembles and groups, which are well supported by Sixth Form students. There are regular concerts, including some organised by Sixth Formers. Kendrick is a centre for the Associated Board examinations in Music.

Mental Health and Wellbeing

At Kendrick School we are committed to promoting positive mental health and emotional wellbeing to all students, their families and members of staff and governors (our school community). Our ethos and culture allow students' voices to be heard, and using effective policies and procedures, we ensure a safe and supportive environment for all affected - both directly and indirectly - by mental health issues.

Our Mental Health and Wellbeing Policy aims are to:

- Promote positive mental health and emotional wellbeing to our school community.
- Increase understanding and awareness of common mental health issues.
- Enable staff to identify and respond to early warning signs of mental ill health in students.
- Enable staff to understand how and when to access support when working with young people with mental health issues. Provide the right support to students with mental health issues and know where to signpost them and their parents/carers for specific support.
- Develop resilience amongst students and raise awareness of resilience-building techniques.
- Raise awareness amongst staff and gain recognition from SLT that staff may have mental health issues, and that they are supported in relation to looking after their wellbeing; instilling a culture of staff and student welfare where everyone is aware of signs and symptoms with effective signposting, underpinned by behaviour and welfare around school.

To read the Mental Health and Wellbeing Policy in full, please click [here](#). The student wellbeing page on the website can be accessed [here](#).

We want everyone in the Sixth Form to be comfortable, happy and able to enjoy their A-level courses from day one. However sometimes there are difficulties along the way. The Sixth Form Team is here to listen to any feelings you have about settling in, friendships, expectations, the future, work – whatever it is, we can listen and put support in place for you. That may be a regular check-in to make sure things are improving for you, or a session on exam anxiety, or how to get more organised. The main thing is for you not to feel alone or that your worry is too small to bother with and staff are available every day in the Sixth Form Office and contactable by email or by visiting them in the Sixth Form Office.

TIMES OF THE SCHOOL DAY

Registration am	8.25am – 8.40am
Period 1	8.45am – 9.45am
Period 2	9.50am – 10.50am
First Break	10.50am – 11.05am
Period 3	11.10am – 12.10pm
Second Break	12.10pm – 12.55pm
Registration p.m.	1.00pm – 1.05pm
Period 4	1.10pm – 2.10pm
Period 5	2.15pm – 3.15pm

Students should leave school promptly at the end of the day unless they are involved in an after school activity. The Library is open until 5.00pm and students are welcome to study there, supervised by a Library Assistant.

TERM DATES 2024/2025

Registration for all Year 12 Students: Friday 23rd August 2024

<p style="text-align: center;">TERM 1 - 2024 Wednesday 4th September to Friday 25th October 2024 <i>INSET Day: Monday 2nd and Tuesday 3rd September 2024</i> <i>Admission Testing: to be confirmed</i></p>
<p style="text-align: center;">TERM 2 – 2024 Monday 4th November to Friday 20th December 2024</p>
<p style="text-align: center;">TERM 3 – 2025 Tuesday 7th January to Friday 14th February 2025 <i>INSET Day: Monday 6th January 2025</i></p>
<p style="text-align: center;">TERM 4 – 2025 Monday 24th February to Friday 4th April 2025 <i>Good Friday: Friday 18th April 2025</i> <i>Easter Monday: Monday 21st April 2025</i></p>
<p style="text-align: center;">TERM 5 – 2025 Tuesday 22nd April to Friday 23rd May 2025 <i>Bank Holiday: Monday 5th May 2025</i> <i>Curriculum Day: Friday 23rd May 2025</i> <i>Bank Holiday: Monday 26th May 2025</i></p>
<p style="text-align: center;">TERM 6 – 2025 Monday 2nd June to Thursday 17th July 2025 <i>INSET Day: July (TBC)</i> <i>Staff Day: Friday 18th July 2025</i></p>

ENTRY REQUIREMENTS

To be admitted into Kendrick's Sixth Form, students will normally have to satisfy the following minimum conditions:

- **8 GCSEs (or recognised DfE equivalent) grades 9-5 (A*-B) two of which must be English Language and Mathematics and all should be from full GCSE courses.**
- **BTEC Level 2 at Distinction*, Distinction or Merit will be accepted.**
- **At least a 6 or grade B at GCSE in the subjects to be studied at AS/A-level, apart from Biology, Chemistry, Physics and Mathematics which requires a 7 or grade A at GCSE**

Due to the high demand for places students should be aware that a place may not be offered despite the prediction of suitable results. **Please read the Year 12 Admission Policy for September 2024 Entry for more information and carefully read our oversubscription criteria which is included in the policy.**

Grade A or 7 or above in the *Higher Tier* is an entry requirement for Mathematics and/or Science AS/A level courses. Students who have taken Foundation Tier GCSE courses in Mathematics and Sciences (rather than Higher Tier) are unlikely to have covered all the appropriate topics from which they can move on to A-level in the context of this school.

Students who wish to study Further Mathematics must achieve a Grade 9-8 (A*) in GCSE Mathematics.

Students would normally be expected to have studied GCSE in subjects they wish to study at A-level. In the case of Classical Civilisation, Economics, Philosophy and Sociology where the subjects may not have been studied at GCSE level, Grade B or 6 in English Literature and a Humanity would be required as a minimum condition of entry to the course.

Students living overseas at the time of application and not taking GCSE courses must provide evidence of the equivalence of their externally taken qualifications to GCSE by an official organisation (for example NARIC).

Students who are Home Schooled will be asked to provide a reference and predicted GCSE grades from a professional body. In the absence of a reference they may be asked to sit mock GCSE examinations at Kendrick School.

Every effort will be made to accommodate students who are offered places and who meet the entry requirements to do the subjects of their initial choice. However, applicants should appreciate that some subject groups may become full and it may not always be possible to accommodate those who wish to change their original subject choices.

In addition to the minimum academic entry requirements, we would expect students to show a committed and positive attitude to study and Sixth Form life. We expect our Sixth Formers to be full members of the school community involved in a wide range of activities and to be prepared to contribute to school life.

HOW TO APPLY – KENDRICK STUDENTS

The majority of students from the main school move into the Sixth Form at Kendrick School. This is the appropriate place for most students to continue their education in the supportive environment with which they are familiar, and with the excellent teaching staff that they already know. However, we do have an admission process that our "existing" students must follow, including completing an options form and meeting with a member of senior staff to discuss their application. The discussion will focus on subject options, higher education aspirations, extra-curricular interests to be followed in the Sixth Form and so on. Kendrick School students will be asked to confirm their intention to remain at Kendrick by Friday 15th March 2024.

Year 11 Preliminary A Level Subject Selection assembly. Preliminary Questionnaire issued to all Year 11 inviting provisional A Level subject selection	Thursday 2 nd November 2023
Post 16 Conference	Tuesday 7 th November 2023
Sixth Form Open Evening	Thursday 9 th November 2023
Deadline for return of Preliminary Questionnaire	Friday 1 st December 2023
Deadline for return of option forms	Friday 2 nd February 2024
Consultation meetings to be held	Week beginning Monday 5 th February 2024
Provisional offers of places will be sent out	By Friday 8 th March 2024
Deadline for accepting/declining a place	Friday 15 th March 2024
Induction Day*	Thursday 27 th June 2024
GCSE Results Day	Thursday 22 nd August 2024
Registration Deadline	Friday 23 rd August 2024 (remote), 10 am
First Day of Term*	Wednesday 4 th September 2024, 8.25am

*compulsory attendance

HOW TO APPLY – STUDENTS FROM OTHER SCHOOLS

We are delighted to receive applications from students from other schools. Please discuss your application with your present Head of Year or Form Tutor, but please actively consider applying to Kendrick if you have the correct academic potential and you feel you could benefit from the outstanding education we offer. We take about 50 new students into the Sixth Form each year, although this does vary from year to year. The entry requirements for the Sixth Form are given on the previous page. Places are in great demand and students are encouraged to apply as soon as possible, after application forms are made available online. **The closing date for the completion of application forms is Friday 19th January 2024.** Kendrick School will request your predicted GCSE grades from your current school and these must be received by **Friday 2nd February 2024.** We will inform you if your school reference form has not been returned to us within 10 days, and we will then ask you to encourage your Head of Year to return it to Kendrick as soon as possible. Applications cannot be considered until both forms have been received by the Admissions Officer at Kendrick School. You will be required to attend a Consultation Meeting which will take place in the week beginning **19th February 2024.** The meeting will be to discuss your subject choices and other aspects of your life at Kendrick.

IMPORTANT DATES

Sixth Form Open Evening	Thursday 9 th November 2023
Online application opens. Link available on our website	Friday 10 th November 2023

Consultation meetings to be held	Wednesday 21 st March 2024
Provisional offers of places will be sent out	By Friday 8 th March 2024
Deadline for accepting/declining a place	Friday 15 th March 2024
Induction Day*	Thursday 27 th June 2024
GCSE Results Day	Thursday 22 nd August 2024
Registration Day	Friday 23 rd August 2024
First Day of Term*	Wednesday 4 th September 2024, 8.25am

*compulsory attendance

GENERAL INFORMATION

Induction Course

A one-day course takes place in June after the GCSE examinations and there are further events in September at the start of Year 12. It introduces students to Sixth Form life. Attendance at this event is compulsory for everyone wishing to attend the Sixth Form at Kendrick School.

Applications to Higher Education

Kendrick has considerable experience and expertise in assisting students with their applications through UCAS (the Universities and Colleges Admissions Service). Virtually 100% of our students apply successfully for university places. We have a proven track record of success in supporting applications, at the most prestigious universities in the country. Students will be given individual support from a UCAS Mentor and will agree their UCAS reference before it is sent to UCAS.

Oxford and Cambridge Entrance

About 30% of Kendrick students apply for entry to Oxford or Cambridge. Entry to both institutions is by application, admission test, possible submission of marked work, interview and conditional offer based on A-level results. It is not possible to provide extra teaching for Oxford and Cambridge entrance, although some staff are very generous in giving up their free time to advise and support students. Interview preparation events are held for students annually and opportunities for mock interviews are provided, both within the school and in a mutual arrangement with other schools.

Part-time Employment

In our experience, it is difficult for students to offer their best in their A-level studies if they have demanding commitments in part-time employment outside school. Research by the University of Newcastle has demonstrated that students who work more than 9 hours per week tend to achieve lower grades. We ask that students plan their relaxation and do not make excessive commitments to paid work.

Education Costs

The law does not allow us to charge for educational visits, for example to an Art exhibition or the theatre. There is, however, insufficient money available in school funds to completely cover the cost of such trips although they are frequently subsidised. We therefore ask parents for a voluntary contribution towards the cost of any educational visits that their child makes, without which such visits could not take place. The 16-19 Bursary is a limited fund made available for supporting eligible young people with the costs of transport, food, books, educational visits or other course materials or equipment essential to successfully completing their programme of study. Further details and an application form are made available to students once they join the Sixth Form.

Exam Entry Fees

Exam entry fees will be met by the school once only for each subject unit. Students must pay a proportion of invigilation costs together with the entry fees for any subsequent retakes.

Educational Visits

Biology and Geography A-level students are required to go on the relevant Field Study course and parents are asked to make a financial contribution towards this. Students who were eligible for Pupil Premium and in receipt of the 16-19 Bursary will be exempt from this payment. Those students studying a modern language are expected to visit France or Germany at some stage during their course.

DESTINATIONS 2023

The destinations for 2023 can be found on our website via this [link](#)

EXAMINATION RESULTS

Kendrick School exam results can be found on our website via this [link](#).

APPENDIX 1 – EXPECTATIONS OF OUR SIXTH FORM STUDENTS

The school is a community which requires some regulations. Please remember that some of its members are only eleven years old, and that we all must try to work together safely and happily. As you have decided to stay at school, or join Kendrick's Sixth Form, we expect you to behave in a manner befitting a Kendrick Sixth Former and be a role model to younger students at all times.

- The school day begins with registration at 8.25am and concludes at 3.15pm. Therefore, as a member of the school, we expect you to be present during these hours. You must attend all registrations on time, timetabled lessons, Directed Independent Study Periods (DISPs), assemblies, Personal Development and Enrichment. Study periods should be used productively and whilst you are allowed off site, there are procedures you must follow – see the Attendance Policy for further details.
- You may NOT book driving lessons during school hours and time off for any interviews or work experience must be by prior permission. In line with current School Policy, any family holidays during term time will be recorded as unauthorised absences. See the Attendance Policy for further details.
- Kendrick's Sixth Form has guidelines for appropriate attire. See the Dress Code for details.
- You are responsible for your school work and will be expected to develop good working patterns so that you meet the deadlines set by staff. Your tutor and heads of subject will be informed if there are problems. If you get behind, or feel overwhelmed by work, discuss this with your tutor who will try to help you to rectify the situation and negotiate with members of staff.
- Think carefully about commitments to paid employment outside school, making sure you leave yourself some socialising and relaxation time. You must not undertake paid employment during the school day. It is not recommended that you undertake paid employment for more than nine hours per week.
- You must spend your structured Directed Independent Study Periods in the Library, the Sixth Form Study Rooms, or in one of the designated rooms, working. You will not be able to cope if you try to do work set for the DISPs as additional homework. The working area in the library is to be considered as a silent working area and food and drink should not be taken there, or in any of the working areas where work is on the computer. Year 12 and 13 have their own study areas with computers in Sidmouth but can use the library for referencing books.
- Music may only be played during breaks. Please do not move around school listening to music – this is for break times only and you will not set a good example to younger years.
- You are free to visit the local shop and do not need to ask permission but **must sign out via the electronic system**. You must however ensure that you have your fob for re-entry and **sign back in**. If you are late into school you must sign in at Reception. If you have permission, for whatever reason, to leave site during the school day you must sign out at Reception, with the initials of the member of staff who gave permission.
- You are responsible for your money and valuables. Do not leave them in form rooms but keep them with you, locked in your locker, or ask for them to be kept in the school safe.
- Maintain a pleasant, tidy environment in the form rooms. Wash up your own dirty crockery. It is a health hazard, and it is not the cleaner's job to wash up dirty mugs and plates, or pick up paper, books and rubbish from the floor.
- Do not bring alcohol, any classified or potentially dangerous substance or object onto school premises. Kendrick operates a no-smoking or vaping policy throughout the whole of the school.

- Mobile phones **must** be switched off during lesson time. Phones which go off during lesson times will be confiscated by any member of staff. Using your phone during break times in the Sixth Form areas is a privilege which can be removed if abused. Mobile phones should not be used around the school grounds as this does not set a good example to the younger years.
- Sixth Formers are required to sign the school's Acceptable Internet and Email Use agreement which emphasises responsible use of this facility in school for educational purposes.
- We expect Sixth Formers to be prepared to be involved in the life of the school and there are events during the year when we need the help of every member of Year 12 and 13.

APPENDIX 2 - SIXTH FORM DRESS CODE

Students in the Sixth Form dress in a manner that best represents the nature of education at Kendrick School. Students display pride in their attire; are smart, presentable and avoid extremes of dress, make up or hairstyle.

Top half

- Tops must cover the shoulders and stomach and not be revealing or low-cut
- Spaghetti straps are not acceptable
- No offensive language or logos

Bottom half

- Skirts or shorts must be of a decent length (should cover at least two thirds of the upper leg, from hip to knee) and suitable for wear in school (not too tight)
- Trousers/leggings should be suitable for wear in school (ripped/scruffy/revealing items should be avoided)

Dresses should be of a suitable length as detailed above and fit the above criteria

Footwear

- Smart pumps, trainers and boots are all acceptable
- Heeled shoes should not be more than three inches and should be suitable for wear in school. Stilettos are not acceptable.
- Flip flops are not acceptable but smart sandals are permitted in summer, as long as they have a strap at the back to hold them securely on the foot. For science and practical lessons, toes must be covered for health and safety reasons.

Accessories

- Jewellery, including facial piercings, should be discrete and acceptable for the workplace
- Hairstyles extreme in colour or fashion should be avoided
- Hats can be worn to and from school, but should be removed during the school day
- Religious items can be worn within reason. The wearing of the head scarf or hijab is acceptable but the wearing of the niqab is not acceptable

Students taking particular subjects, such as science, should be sympathetic to the nature of their lessons and dress accordingly. For science, students are expected to provide their own lab coat and goggles.

If students have any doubt as to the suitability of their attire, they should check with a member of the Sixth Form Team.

Enforcement of the Policy

First and foremost, students are expected to consider the suitability of their attire carefully each day. Students are expected to be proactive in reminding their friends of the dress code where necessary. The Kendrick Student Leaders, prefects and Form Captains should not only set an example but should also engage in self-regulation to minimise the input needed from staff.

It is the responsibility of the Head Teacher and staff to monitor and enforce the dress code as part of the day to day running of the school. Parents/carers have the responsibility to ensure that students come to school in suitable clothing, but Sixth Form students are also expected to take responsibility for their own attire.

In the first instance, the Form Tutor should deal with any minor breach of the uniform policy. A message could be sent home via a note in the student's homework diary and a record should be made on SIMS.

Subsequently the student will be referred to the Teaching and Learning Coordinator (TLC).

If the dress code is repeatedly breached, the TLC will contact parents/carers to discuss the concern.

If this does not produce the desired result, the TLC will meet with the parents/carers and student to attempt to resolve the issue.

Finally, the student will be sent to a member of the Senior Leadership Team (SLT) who will, if necessary, send the student home to change.

In the case of jewellery and other accessories which infringe the policy, a member of staff may ask the student to remove the item. It will be taken to the General Office and may be collected at the end of the school day.

The Head of Sixth Form and the Head Teacher are the final arbiters in all matters of uniform and dress.

APPENDIX 3 – ADMISSION POLICY FOR ENTRY INTO YEAR 12 SEPTEMBER 2024

Kendrick School is a selective girls' school with academy status.

Kendrick School Admissions Number

Kendrick School intends to admit 40 students into Year 12 in addition to those who progress from Year 11 at Kendrick School.

Application for a place

Kendrick School offers the A level curriculum in the Sixth Form. Applications will be accepted from students born between 1 September 2007 and 31 August 2008 and who will be in Year 11 at the time of application.

Applications must be made directly to Kendrick School, not to the Local Authority. Kendrick School will adhere with the local agreed In-Year Fair Access Protocol.

Entry into the Sixth Form

The GCSE entry criteria below apply equally to internal and external applicants.

For entry into Kendrick School Sixth Form, applicants will normally have to satisfy the following minimum conditions:

- 8 GCSEs (or DfE recognised equivalent) grades 9-5 or A* - B, two of which must be English Language and Mathematics.
- BTEC Level 2 at Distinction*, Distinction or Merit will be accepted
- GCSE short courses cannot be accepted.
- At least a 6 or grade B at GCSE in the subjects to be studied at AS/A-level, apart from Biology, Chemistry, Physics and Mathematics which requires a 7 or grade A at GCSE.
- Grade A or 7 or above in the *Higher Tier* is an entry requirement for Mathematics and/or Science AS/A level courses. Students who have taken Foundation Tier GCSE courses in Mathematics and Sciences (rather than

Higher Tier) are unlikely to have covered all the appropriate topics from which they can move on to A-level in the context of this school.

- Students who wish to study Further Mathematics must achieve at Grade A* or 9-8 in GCSE Mathematics.
- Students would normally be expected to have studied GCSE in subjects they wish to study at A-level. In the case of Classical Civilisation, Economics, Philosophy and Sociology where the subjects may not have been studied at GCSE level, Grade B or 6 in English Literature and a Humanity would be required as a minimum condition of entry to the course.
- Students living overseas at the time of application and not taking GCSE courses must provide evidence of the equivalence of their externally taken qualifications to GCSE by an official organisation (for example NARIC).
- Students who are Home Schooled will be asked to provide a reference and predicted GCSE grades from a professional body. In the absence of a reference they may be asked to sit mock GCSE examinations at Kendrick School.

Timetable

- The process for routine admission into the Sixth Form at Kendrick School (Year 12) for entry in September 2024 begins in November 2023 and ends on 1st September 2024.
- Application forms will be available online after the Sixth Form Open Evening which will be held in the Autumn 2023
- Applicants who do not have access to a computer should contact the Kendrick School admission team for assistance.

Deadline for receipt of applications

- Individual applications must be received by Kendrick School by **Friday 19th January 2024**.
- School Reference Forms must be received by Kendrick School by **Friday 2nd February 2024**.

Late Applications

Applications received after the deadline will be treated as late applications but will be considered if submitted by 1st September 2024. Late applications are those which are received after the closing date (19th January 2024) and so cannot be considered with the “gathered field” of on-time applications. (See Treatment of Applications section.)

Late applicants will be added to the Waiting List in order according to their ranking as determined by their predicted GCSE scores. (See sections on “Treatment of Applications” and “Waiting List”).

Treatment of Applications in the Gathered Field (external candidates only)

- The gathered field of applications consists of those applicants whose application form was received before the deadline and the school reference form has been received by **Friday 2nd February 2024**.
- Suitable applicants will be invited to the school for Consultation Meetings. The purpose of these meetings is to explain the options available in the Sixth Form and the entry requirements for the courses.
- Provisional offers will be made no later than **Friday 8th March 2024**.
- Applicants will be assessed for suitability to attend a consultation meeting according to a points system as follows:
 - Up to a maximum of the 8 best full course GCSE predicted grades, scored on the GCSE grades for reformed GCSE subjects and the DfE equivalence system: (A*- 8.5 points; A- 7 points; B – 5.5, C-4 points etc.) for the unreformed GCSEs. Two of the subjects must be full course GCSE Mathematics and English Language.
- Applicants will be placed in a rank order according to the points scored as above. Candidates with a score of 54 or above (“the cut off point”) will be invited to a consultation meeting, according to the oversubscription criteria below if there are more applicants than places available. The number of applicants invited is subject to the number of places available.
- In the first round of consultations, applicants will only be invited to consultation if they are currently living within the designated area unless there are exceptional circumstances.

Education, Health and Care Plan

Children who have an Education Health and Care Plan where Kendrick School has been named by the Local Authority will be admitted automatically¹ and the number of places available to other applicants will be reduced accordingly.

Oversubscription Criteria

Oversubscription criteria will be applied if the number of applicants with a points score of 54 or above exceeds the available number of places

In the case of over-subscription, places will be offered first to all internal applicants then to external applicants.

Offers will be made from the ranked list in the following order and within each category until all places have been allocated:

1. The applicant is a looked after child or previously looked after child²
2. The permanent home address of the applicant is within **Priority Area 1 or 2** of the designated area of the school on **31st August 2024 and they should still be living there at the time of admission to the school** and the applicant is a Pupil Premium or Service Premium child³. Documentary evidence that the child is in receipt of Pupil Premium or Service Premium will be requested from the current school.
3. The applicant's home address is within **Priority Area 1 or Priority Area 2** of the designated area of the school and this home address is the permanent address of the parent/carer and the applicant on **31st August 2024 and they should still be living there at the time of admission to the school**.
4. Applicants whose home address is NOT in the designated area of the school.

***Note:** in Categories 1) and 2) above, any such an applicant, provided she has achieved a predicted score of 54 or more, will be offered a place. The total number of places offered will be subject to the availability of courses and the total admission number for Year 12 not exceeding 140 (internal and external applicants).*

Designated Area

The designated area is made up of **Priority Area 1** and **Priority Area 2** and each area is determined by the postcode of the applicant's permanent home address. Places will be offered to applicants who are ranked high enough according to the GCSE point system described above and who reside within the designated area. This must be the applicant's permanent home address with their parent/carer on 31st August 2024 **and they should still be living there at the time of admission to the school**. The school may ask for documentary evidence to support the application. Only if there are further places available will applicants who live outside the designated area be considered. The address which will be used for consideration to be living within the designated area must be the applicant's permanent address **by 31st August 2024 and they should still be living there at the time of admission to the school**. The exception to this is Crown Servants or members of the Armed Forces. See **Appendix 1** for the list of postcodes within the designated area.

Definition of Permanent Home Address

An applicant's permanent home address is their normal place of residence, excluding any business address or a relative or childminder's address, and must be the permanent place of residence of the parent/carer with whom the applicant spends the majority of their time. Where there is a formal residence order or child arrangements order which states that care of the child is equally shared between parents/carers, then it is up to them to agree which address to use for the purpose of making a school place application. If care of the applicant is not equally shared, the address of the parent with whom the applicant spends the majority of their time must be used.

Evidence is required of a single address on 31st August 2024. The school may ask for documentary evidence to support the application.

If the permanent home address changes **between when an offer is made and 31st August 2024**, Kendrick School will require documentary evidence of the new address. In all cases applicants will need to provide evidence that the previous home is no longer used by the family, for example proof that the property has been sold or that it is no longer available for the family to live in or that a rental agreement has ended.

Once offers have been made, Kendrick School will require documentary evidence of the applicant's permanent home address. This will include consideration as to whether or not the address used to make an application was

temporary. Kendrick School reserves the right to carry out random checks at any time and this may include a home visit. Parents will be required to declare that the address used will be their place of residence beyond the date of the student starting school. Kendrick School reserves its right to carry out further investigation of any change of address once the student has started school. If the applicant's permanent home address changes **after application and before 31st August 2024 and would result in a lower ranking**, the new address will be taken into account immediately and the applicant re-ranked accordingly.

Waiting List

- The Waiting List will be used to offer places if any of the original offers are declined before 1st September 2024.
- It will consist of all applicants above the cut-off point who have not received an offer of a place by 8th March 2024 and any Late Applicants whose score is above the cut-off point.
- Waiting List applicants will be invited, in rank order, according to the oversubscription criteria to a consultation meeting on the basis of:
 - The overall availability of places.
 - Their subject choices.
 - The availability of places in those subjects.

Applicants who remain on the waiting list after 30th June 2024, will be advised to contact the Admissions Officer, after GCSE results have been published, if they still wish to be considered for a place in the event of any becoming available. Details of the specific contact address will be given. These applicants will be considered, in rank order, on the basis described above. Applicants who do not confirm their continuing interest in a place will not be approached until those who have contacted the Admissions Officer at the school have been considered. It is unlikely that any places will be offered after the second week in September 2024.

Tie-break situation

- Where two or more suitable candidates on the Waiting List have the same score, an invitation to a consultation meeting will be determined by distance from school.
- In the event of any places remaining once all applicants on the Waiting List have been considered, the Waiting List may be extended to those below the cut-off point. Where two or more suitable candidates have the same score, an invitation to a consultation meeting will be offered according to the oversubscription criteria. Thereafter, invitations to a consultation meeting will be determined by random allocation.
- In the event of random allocation being used, an independent adjudicator (Reading Local Authority) will be appointed.

Oversubscription of Courses

Every effort will be made to accommodate students who are offered places and who meet the entry requirements for a place in Year 12 to do the subjects of their initial choice. However, applicants should appreciate that some subjects may become full. This will be most relevant to late applicants, to those offered places from the waiting list and to those who wish to change their original subject choices. Whilst the offer of a place will remain valid, students' options may be governed by availability in individual subjects.

Confirmation of Places

Offers made by 8th March 2024 (or subsequently, in the case of late applications and waiting list applications) will be conditional on the applicant meeting the entry requirements in general and for the chosen subjects in particular. Offers are conditional on applicants confirming the place by 15th March 2024 or, in the case of late application/waiting list offers, by the deadline given. **Offers will lapse if written confirmation is not received by the school by the given deadline.**

Fraudulent Applications

Any information that is subsequently proven to be inaccurate will potentially invalidate that application. Those who submit fraudulent or deliberately misleading applications may also be subject to legal proceedings.

Passport Requirements:

All students must be entitled to hold a full British Citizen passport or have the right of residence in the United Kingdom.

Appeals

Parents/carers and students have a right of appeal to an Independent Appeal Panel if they are not offered a place. Further details can be obtained online at Reading Borough Council's website or on the school's website.

¹An Education, Health and Care Plan is a plan made by the local authority under Section 37 of the Children and Families Act 2014 specifying the special education provision required for that child. Section 39(2) of the Children and Families Act 2014 requires the local authority to consult the school before naming a school on the Education Health and Care Plan. Section 39(4) gives the only reasons why a school should not be named as "(a) the school or other institution requested is unsuitable for the age, ability, aptitude or special educational needs of the child or young person concerned, or (b) the attendance of the child or young person at the requested school or other institution would be incompatible with – (i) the provision of efficient education for others, or (ii) the efficient use of resources." Kendrick School will therefore work with recognised authorities during the consultation process to ensure that a child with an Education, Health and Care Plan is of suitable ability to be successful in a selective school context.

²A 'looked after child' or a child who was previously looked after but immediately after being looked after became subject to an adoption, child arrangements, or special guardianship order including those who appear [to the admission authority] to have been in state care outside of England and ceased to be in state care as a result of being adopted. A looked after child is a child who is (a) in the care of a local authority, or (b) being provided with accommodation by a local authority in the exercise of their social services functions (see the definition in Section 22(1) of the Children Act 1989).

³ Pupil Premium are those students who have received funding for free school meals at any point in the last 6 years or who are currently eligible for free school meals. The Service Premium is designed to support children with parents/carers serving in the regular British armed forces. Students attract the Premium if they meet the following criteria: one of their parents/carers is serving in the regular armed forces (including students with a parent who is on full commitment as part of the full time reserve service); one of their parents/carers served in the regular armed forces since 2016 or one of their parents/carers died while serving in the armed forces and the student is in receipt of a pension under the Armed Forces Compensation Scheme (AFCS) or the War Pensions Scheme (WPS) .

APPENDIX 4- DESIGNATED AREA

PRIORITY AREA 1

RG1

RG2 0, RG2 6, RG2 7, RG2 8

RG30 1, RG30 2, RG30 3, RG30 4, RG30 6

RG31 4, RG31 5, RG31 6, RG31 7

RG4 5, RG4 6, RG4 7, RG4 8

RG5 3

RG6 1, RG6 5, RG6 6, RG6 7

PRIORITY AREA 2

RG2 9, RG4 9, RG5 4, RG6 3, RG6 4, RG7, RG8, RG9, RG10, RG12, RG27 0, RG40, RG41, RG42, RG45

GU17 0, GU46, GU47

SL6 3, SL6 4, SL6 5, SL6 6

NB: Postcode district is indicated by the first digit and the postcode sector by the second digit. Eg RG1 5BN: 1 represents district; 5 represents sector.

Temporary Addresses

Some residential arrangements will be considered temporary. In such cases, evidence will determine whether, on balance, the declared home address may be considered the child's permanent home for the purpose of admission.

In cases where the declared address is rented, yet the applicant has no claim on another property, it may still be considered a temporary address where there is evidence to show the applicant is renting the property solely for the period necessary to secure admission to a school.

A temporary address cannot be used to obtain a school place and will only be considered where evidence is provided showing a genuine reason for the move e.g. homelessness, flooding or subsidence

Multiple Properties

Checks will be made to determine whether the home address declared is that of a second home (with the main home being elsewhere).

Any circumstance where the declared address is to be accepted as the permanent home, despite another home being owned or otherwise available for occupation, should be declared at the point of application. Without being exhaustive these might include:

- an owned property being a considerable distance from the preferred school, indicating that the family had permanently relocated to the new home; or
- an owned property that is uninhabitable and cannot reasonably be made habitable in the period leading up to admission to the school; or
- an owned property that is in the process of being sold and the family live permanently in the declared property; or
- a family home that, following divorce or separation, cannot be occupied by the applicant or otherwise treated as the child's permanent home.

The Governors may refuse to base an allocation on an address which might be considered only a temporary address or an address of convenience. An address of convenience is considered to be an address used for the purposes of gaining a school place which is not a child's normal, permanent residence.

If the permanent home address of an applicant is incorrectly stated or a parent/carer submits false or misleading information or deliberately withholds any relevant information, the application will be invalid and will result in the withdrawal of an offer of a place or a place already accepted at the School.

Once offers have been made, Kendrick School will require documentary evidence of the applicant's permanent home address. Kendrick School reserves the right to carry out random checks at any time and this may include a home visit and/or consulting with the Local Authority and primary school. Parents will be required to declare that the address used will be their place of residence beyond the date of the student starting school. Kendrick School reserves its right to carry out further investigation of any change of address once the student has started school.

AS and A-Level Subject Information for 2024 Entry

ART & DESIGN

A Level

Assessment: A Level (2 year) Personal Investigation Component 60%; Externally Set Assignment 40%

Exam Board: Eduqas

Subject specification codes: A Level – A650QS

Subject specification:

<https://www.eduqas.co.uk/media/a3ndenvr/eduqas-a-level-art-and-design-spec-from-2015-e-090119.pdf>

What will I study?

The Art and Design A Level will enable students to explore a range of approaches, styles and media to their studies. Work produced for this title will demonstrate use of visual language, creative skills and will allow students to express their thinking, feelings, observations and ideas. Students will be encouraged to work and develop skills using a wide variety of media and techniques across the disciplines. Within their studies, students will explore the connections between artists, art history, art theory, and other contextual research, gaining knowledge to further their concepts.

The Art, Craft and Design course aims to encourage students to develop:

- Intellectual, imaginative, creative and intuitive capabilities. Investigative, analytical, practical and expressive skills, aesthetic understanding and critical judgment.
- Independence of mind in developing, refining and communicating their own ideas, their own intentions and their own personal outcomes.
- Their experience of working with a broad range of media.
- Knowledge and experience of real-world contexts and, where appropriate, links to the creative industries.
- An understanding of the relationship between art, craft and design and an awareness of contemporary and contextual study.

It is expected that students will possess excellent powers of self-discipline and self-motivation, aim to be capable of creating work to their highest possible technical standard and are willing to confidently experiment, without fear of failure.

The **Personal Investigation Component** (Coursework) allows students opportunities to generate and develop ideas, research primary and contextual sources, record practical and written observations, experiment with media processes, and refine ideas towards producing resolved outcomes. Supporting studies and practical work will comprise a portfolio of development work and outcomes based on ideas developed from personal starting points.

An **extended writing** element will be evidenced through critical written communication showing contextual research and understanding in a minimum 1000 words which is **incorporated** into the **Personal Investigation Component**.

The **Externally Set Assignments** (Exam) for A Level incorporate two major elements: preparatory studies and a **15 hour** period of sustained focus. The title of which is received in the February of Year 13.

What next?

If you wish to continue studying Art & Design beyond A Level, the next stage could involve applying for a year-long Foundation course, which is designed to prepare you for entry to degree-level Art and Design programmes at University, or to immediately apply to degree course at a University or Art College.

BIOLOGY

AS and A level

Assessment: Examination (100%) Practical endorsement (0% - pass/not classified)

Exam board: Edexcel

Subject specification code: **AS** – Biology B (8BIO); **A Level** –Biology B (9BIO)

Subject specification: <https://qualifications.pearson.com/en/qualifications/edexcel-a-levels/biology-b-2015.html>

What will I study?

The Edexcel B specification is designed to build an appreciation of the structure and physiology of a variety of organisms and the significance of human interactions with the environment. You will also consider how society makes decisions about scientific issues and how the sciences contribute to the success of the economy and society.

The course in Year 12 matches the AS level Biology specification and builds on knowledge from GCSE in addition to introducing new ideas and concepts. You will be studying four units: 1. Biological Molecules; 2. Cells, Viruses and Reproduction of Living Things; 3. Classification and Biodiversity; 4. Exchange and transport.

In the latter part of Year 12 and continuing into Year 13, a further six additional units are studied: 5: Energy for Biological processes; 6. Microbiology and Pathogens; 7. Modern Genetics; 8. Origins of Genetic Variation; 9. Control Systems; 10. Ecosystems.

Biology is an experimental Science so you will carry out a range of laboratory and field-based activities to enhance your understanding and develop your practical skills. This course gives you opportunities to use relevant apparatus to develop practical skills and demonstrate competency in a range of practical techniques. You will be assessed on your ability to use 12 specific techniques and skills listed through carrying out a number of identified practical activities within this specification, which will allow you to gain the Science Practical Endorsement for Biology in addition to your A Level grade. These practical competencies will also be assessed in the external examinations.

What next?

Biology is a key course for students planning to continue on to university to study Science-based degrees including Medicine, Biomedical Sciences, Dentistry, Veterinary Science, Physiotherapy, Biochemistry, Marine Biology, Midwifery, Nursing, Environmental Science and Sports Science. The practical, analytical and research skills that you will develop through this course provide a strong grounding for pursuing not only Science-based courses, but also many other subject areas at degree level.

CHEMISTRY

AS and A Level

Assessment: Examinations (100%). In addition, for A-level, there is a 'Practical Skills Endorsement' that is teacher assessed (pass/fail).

Exam board: AQA

Subject specification codes: AS 7404; A-Level 7405

Subject specification: <http://www.aqa.org.uk/subjects/science/as-and-a-level/chemistry-7404-7405/introduction>

What will I study?

During the first part of Year 12, the concepts and ideas studied at GCSE level will be reviewed and built on, with topics including Atomic Structure and Bonding, Chemical Calculations and Basic Organic Chemistry. This allows all students, regardless of the specification studied at GCSE level, to gain a firm basis for progression. During the second part of Year 12, topics such as Energetics, Kinetics, Alkenes, Alcohols and Group 2 Metals are covered.

Towards the end of Year 12 and into Year 13, more advanced topics are studied. Organic Chemistry is developed further with topics such as Stereoisomerism, Aromatic Chemistry and Structure Determination (including NMR) being taught. Advanced Inorganic and Physical Chemistry topics include Thermodynamics, Redox Equilibria and Transition Metals. The complete two years of study lead to the A-level examination.

During the two year A-level course students will develop their practical skills through carrying out a range of experiments including twelve required practical tasks. Practical skills are assessed within the A-level written examinations. In addition, a separate 'endorsement of practical skills' will be taken alongside A-level. This will be assessed by teachers and will be based on direct observation of students' competency in a range of skills that are not assessable within written examinations.

To provide flexibility, students may have the option of taking an AS examination in Chemistry in the summer of Year 12. This is a stand alone qualification and marks from AS do not contribute to A-level. The content of the AS course is the same as the early parts of the A-level course, but assessed at a lower level. Students must carry out six required practical tasks that are assessed within the AS written examinations.

Chemistry provides students with the opportunity to develop a range of skills including analytical skills, independent learning and practical skills.

What's next?

Chemistry is a rigorous and in-demand A Level subject. The versatility of Chemistry at A Level means that the student who achieves a good Chemistry result can go on to do a variety of degree courses at university. As well as the study of Chemistry, other popular degree courses include Biology, Biochemistry, Engineering, Pharmacology, Veterinary Science and Medicine. An A Level in Chemistry is required for the study of Medicine at most Universities and Medical Schools.

The study of Chemistry provides a sound basis for careers directly using Chemistry, such as Medicine, as well as for many others in which the problem-solving, numeracy and linguistic skills acquired during the course are highly regarded, such as Law and Management.

CLASSICAL CIVILISATION

Examination Board: OCR

Subject specification codes: A Level – H408; AS –H008

Subject specification:

A Level: <https://ocr.org.uk/Images/315133-specification-accredited-a-level-classical-civilisation-h408.pdf>

AS Level: <https://ocr.org.uk/Images/315110-specification-accredited-as-level-classical-civilisation-h008.pdf>

Assessment:

Assessment is through examinations at the end of the second year of study (A Level) or at the end of the first year (AS), testing knowledge of literary and visual sources and of classical ideas and concepts. In addition, candidates will be tested on their ability to analyse and respond critically to the sources covered throughout the course. This is done through a mix of extended responses to given sources and some smaller knowledge recall questions. The exams are:

A Level Examinations

World of the Hero (40%) – 2 hour 20 minutes

Greek Theatre (30%) – 1 hour 45 minutes

Politics of the Late Roman Republic (30%)– 1 hour 45 minutes

AS Examinations

World of the Hero (50%) – 1 hour 30 minutes

Greek Theatre (50%) – 1 hour 30 minutes

What will I study?

This course is multidisciplinary and provides students with a good range of skills required for university study.

Students will study a mix of Greek and Roman texts and encounter aspects Graeco-Roman history and culture which have played such a foundational role in many modern societies. The course is studied and assessed entirely in English so students do not require a knowledge of Ancient Languages such as Latin or Ancient Greek.

For the A Level: We will study both Homer's *Odyssey* and Virgil's *Aeneid*, two of the foundational works of Western literature. We will read these together and examine prevalent themes, points of interest and points of comparison between the two texts. In addition to this, we will study the Greek theatre module where we will be analysing the role of Greek theatre on Athenian society and study three of the most famous Greek plays: *Oedipus Rex*, *the Bacchae* and *the Frogs*. Our final module will be on the Politics of the Late Roman Republic. We will study a lot of the characters that played a major role in this period and assess their impact on the eventual collapse of the Republic, where our study ends.

For the AS: Students will study Homer's *Odyssey* and Greek Theatre if they opt to complete an AS.

Teaching time will be split between the three modules, covering the *Odyssey* and the Greek Theatre module in Year 12 and the *Aeneid* and Politics of the Late Republic in Year 13.

What next?

Classical Civilisation is a useful qualification for those interested in the study of Classics, Ancient History, Classical Civilisation, Law, History and a variety of other degree programmes. Classical Civilisation provides students with a range of skills desirable to university course and employers these include: analysis, constructing an argument, debate, extended writing and the ability to think critically.

A Classics degree has a high rate of employment success and is popular with employers because it develops skills of independent, critical thinking, analysis and evaluation, and communication. The career opportunities are very wide but could include: academic or other fields of research, the legal profession, journalism, business and management. More Information from OCR on why you might take Classical Civilisation can be found at:

<https://ocr.org.uk/Images/309124-why-study-a-level-classical-civilisation-.pdf>

COMPUTER SCIENCE

AS & A Level

Assessment: A Level: 80% Examination, 20% Non-Examination Assessment (NEA); AS Level: 100% Examination

Exam Board: AQA

Subject specification code: AS Level: 7216; A Level: 7517

Subject specification: <https://filestore.aqa.org.uk/resources/computing/specifications/AQA-7516-7517-SP-2015.PDF>

What will I study?

Computer Science is a course suitable for students who would like to study a mathematical and logic-based subject, tackling a range of techniques, from coding creative solutions to calculating the mathematical complexity of algorithms. Students comfortable with mathematics and logic-based puzzles are often most drawn to this subject. For students to manage the content level, they must have at least a grade 6 in GCSE Mathematics to take Computer Science at A level.

This Computer Science course also covers less mathematical topics that are vital to the well-rounded understanding of computer science, such as: learning about the intricacies of computer hardware so we understand the machines we use and ethical evaluation of computing so we can recognise the consequences of the use of computers – topics not to be considered lightly when we think about how much computers are relied upon every day.

	Topics including:	A Level	AS Level
Paper 1	Fundamentals of programming; Fundamentals of data structures; Theory of computation; Systematic approach to problem solving	<i>40% of A-level Type: On-screen (programming) exam Length: 2 hours 30 minutes</i>	<i>50% of AS level Type: On-screen (programming) exam Length: 1 hour 45 minutes</i>
Paper 2	Fundamentals of data representation; Fundamentals of computer systems; Computer architecture; Consequences of uses of computing; Fundamentals of communication and networking; Fundamentals of databases; Big Data	<i>40% of A-level Type: Written exam Length: 2 hours 30 minutes</i>	<i>50% of AS level Type: On-screen exam Length: 1 hour 30 minutes</i>
NEA (Non-Examination Assessment)	Systematic approach to problem solving Non-exam assessment - the computing practical project	<i>20% of A-level Type: Individual project Marks available: 75</i>	<i>N/A</i>

The non-exam assessment (NEA)

This part of the course is designed to be both a learning process and an assessment. The NEA is a project that students work on to demonstrate their practical skills gained over the course and creativity of design that could not be shown in the space of time of an exam. Though there is project title guidance and rough title suggestions can be provided, the project focus is entirely up to the student allowing them the exciting opportunity to explore a field of personal relevance to them or something which they have a strong knowledge-base in.

What next?

Studying Computer Science encourages the development of a deep understanding of computational thinking, logical inference and ethical thinking concerning the impacts of computing. It provides a strong basis for many mathematically and creatively minded courses. It is particularly fitting for those expecting to study Computer Science, Mathematics or Physics or related courses in further education. Programming skills are highly desirable in many fields as are the logical thinking skills gained in a Computer Science A level. Computer Science skills are also highly sought for in the workplace not least with the growing demand for more software engineers and data analysts.

DRAMA AND THEATRE STUDIES

A Level

Assessment: Devising 40%; Text in performance 20%; Written examination 40%

Exam Board: Edexcel

Course Code: AS – 8DRO; A Level - 9DRO

Subject specification: https://qualifications.pearson.com/content/dam/pdf/A%20Level/Drama-and-Theatre/2016/Specification%20and%20sample%20assessments/a-level_drama_spec.pdf

What will I study?

The course utilises and develops a range of academic, practical, creative and communication skills. Throughout the two years, you will extend your ability to create drama and theatre, throughout a range of performing and/or production roles. You are also required to write about a set text which enhances and refines your analytical skills to become an informed critic, in the written examination. The course will involve taking part in drama productions as: a performer, designer and director, as well as studying plays and playwrights.

A Level	Component 1: Devising (Component Code: 9DRO/01)
Content summary: This coursework component requires the group to devise an original piece of theatre, using one key extract from a performance text and a theatre practitioner as stimuli. It is assessed through a written portfolio and a performance (with the choice of being assessed as a performer or designer), which is internally marked and externally moderated.	
A Level	Component 2: Text in performance (Component Code: 9DRO/02)
Content summary: This performance component requires a group performance or design realisation of one key extract from a performance text and a monologue/duologue performance or design realisation from a different text. It is assessed by a visiting external examiner, or there is an option of the performance being recorded and sent off to be externally assessed.	
A Level	Component 3: Theatre Makers in Practice (Component Code: 9DRO/03)
Content summary: This component is assessed through written examination, which is externally marked. Students will practically explore a complete performance text, focusing on how this can be realised for performance. They will then explore another complete performance text in the light of a chosen theatre practitioner. They will also analyse and evaluate a live theatre production in which they have seen.	

What next?

The skills you acquire in Drama and Theatre Studies A-level are useful in any subject area you may study at University. While it can lead to further study in Drama, Theatre Studies and Performing Arts in Higher Education, the study of Drama at this level complements a range of subjects including English, History, Law and Politics. Studying the subject also builds confidence and improves presentation skills, which are needed in most careers, particularly within today's society. It can broaden your studies and, of course, provides good grounding for a career in the performing arts industries.

ECONOMICS

AS and A level

Assessment: Examinations (100%)

Exam Board: Pearson Edexcel (Economics A)

Subject Specification code: AS-Level 8ECO A-Level 9ECO

Subject specification:

https://qualifications.pearson.com/content/dam/pdf/A%20Level/Economics/2015/specification-and-sample-assessment-materials/A_Level_Econ_A_Spec.pdf

What will I study?

Economics is the issue of the times in which we live. The financial crisis, global recession, Eurozone's debt problems, COVID-19 lockdowns and the UK's vote to leave the EU have impacted on the economic fortunes of nations, businesses and individuals. Events of recent years, including the government's response to the global pandemic, underscore the need for analysis to make sense of a chaotic, complex and rapidly changing world economic picture.

Studying Economics enables you to access, analyse and evaluate a whole array of current affairs; helping you to argue, make informed decisions and provide a deeper understanding of the world around you. Ever wondered what a budget deficit and austerity really mean? What are the impacts of Brexit for the UK and the Rest of the World? What caused the 2008 Financial Crisis? How could an entire country like Greece actually completely run out of money? What are the impacts of the UK Government paying 80% of many workers' wages during lockdown? These questions (and many more) are just a few of the possibilities that studying A-Level Economics will shed light upon.

During Year 12 you will study how individuals allocate scarce resources to satisfy infinite human wants and the different economic systems used to allocate these resources, focussing upon communism, socialism and capitalism. As well as the views of theorists like Hayek, Karl Marx, Adam Smith and John Maynard Keynes. In addition, you will be introduced to the key measures of economic performance: inflation, unemployment and economic growth plus how fiscal and monetary policies are used by the government and the Bank of England to influence the economy.

In Year 13 you will study the pricing and output decisions of monopolies, oligopolies and other market structures. In addition, we explore concepts such as game theory and John Nash's famous equilibrium, as well as discovering just why different Starbucks charge different prices for the same latte, despite each café being only a few metres away! You will study poverty and inequality, emerging and developing economies, the financial sector and the labour market.

In the Economics department, all resources are fully digitalised on the school's intranet system (SharePoint) and this allows students to fully access all lesson material, notes and PowerPoint slides, so that concepts can be re-visited after lessons to consolidate understanding. To give our students a more rigorous education, students will have the opportunity to enrich and apply their learning with super-curricular activities outside of the classroom; we promote the Student Investor Challenge, Economics Society and numerous other opportunities throughout the year. Furthermore, support and advice is provided for the Royal Economic Societies' essay challenge, a highly respected and essential competition for any aspiring Economics undergraduate.

What next?

Economics is a highly sought-after A-Level, with entrants up 70% nationally since 2009. The versatility of Economics complements the study of Mathematics, Biology, Chemistry, History, Geography, Sociology, a Modern Foreign Language or English and it provides a strong basis for the study of a range of subjects at degree level.

ENGLISH LITERATURE

AS & A-Level

Assessment: 80% examination; 20% coursework

Exam Board: OCR

Subject specification codes: AS – H072; A Level – H472

Subject specification: <http://www.ocr.org.uk/qualifications/as-a-level-gce-english-literature-h072-h472-from-2015/>

What will I study?

This is a course that delves deeply into the human experience. It explores debates concerning the meaning, intention and impact of literary texts in their explorations of humanity and the world, as well as the nature of literature itself.

The course is based around discussion and wide, independent reading. Students are encouraged to develop the intellectual confidence to explore writers' purposes, techniques, contexts, themes and effects on an increasingly complex level. Students develop their skills in critical thinking through exploring and evaluating different critical interpretations, through class discussions, and their own research and writing.

Students study a wide variety of texts, covering prose, poetry and drama, from the 17th to the 21st Century. The texts are selected to both represent key texts in the history of literature and also to provide enjoyment and enrichment. Students also choose a text of their own to study and research for coursework. Most students find the process of wide reading in order to select their text one of the most fascinating and rewarding aspects of the course. Typical choices are novels by Monica Ali, Chimimanda Ngozi Adichie, Ian McEwan and Zora Neale Thurston.

A Level

Unit 1 Drama and Poetry pre-1900 (40%)

- A Shakespeare play, currently *Measure for Measure*
- Comparison of a play and a poet, currently Milton's *Paradise Lost* and Oscar Wilde's *An Ideal Husband*

Unit 2 Comparative and Contextual Study (40%)

- An essay exploring connections between two 20th century novels, on a particular topic, currently American literature. The set texts are currently Fitzgerald's *The Great Gatsby* and Nella Larsen's *Passing*
- An essay on an unseen prose extract based on the chosen topic, involving both close and wider reading.

Unit 3 Coursework (20%).

- A close reading of a 21st Century poem. The current set text *Poems of the Decade, the Forward Anthology*
- Comparison of two texts, one set, one of student choice. The current set text is Tennessee Williams' *A Streetcar Named Desire*

AS Level

Unit 1 (50%)

Shakespeare and poetry: two separate essays (same text list as A level)

Unit 2 (50%)

Modern prose (texts drawn from Unit 2 in the full A Level) and Modern drama (this text will also be used in the coursework for the A Level, to enable full co-teachability). Two separate essays.

What next?

This is a key subject for students planning to study any of the humanities, law, languages, communications, liberal arts or media at university, and as a foundation subject it is highly respected at all major institutions.

FRENCH

A-Level

Assessment: Examinations: (100%)

Examination board: AQA

Subject examination codes: AS – 7651 A Level – 7652

Costs: Work Experience to France (Halsbury): £600-700 (optional)

A-level French themes and sub-themes:

- Aspects of French-speaking society: current trends
- Aspects of French-speaking society: current issues
- Artistic culture in the French-speaking world
- Aspects of political life in the French-speaking world

Subject specification: <http://www.aqa.org.uk/subjects/languages/as-and-a-level/french-7652>

What will I study?

A Level

Paper 1: Listening, reading and writing

How it is assessed

- Written exam: 2 hours 30 minutes
- 100 marks • 50% of A-level

Paper 2: Writing

What is assessed?

- One text and one film or two texts from the list set in the specification
(Kiffe Kiffe demain and La Haine)

- Grammar

How it is assessed

- Written exam: 2 hours
- 80 marks in total
- 20% of A-level

Paper 3: Speaking

What is assessed?

- Individual research project
- One of four sub-themes ie Aspects of French-speaking society: current trends

Aspects of French-speaking society: current issues

Artistic culture in the French speaking world
Aspects of political life in the French-speaking world

How it is assessed

- Oral exam: 21–23 minutes (including 5 minutes preparation time)
- 60 marks in total • 30% of A-level

AS

Paper 1: Listening, reading and writing

- Written exam: 1 hours 45 minutes
- 90 marks • 45% of AS

Paper 2: Writing

- One text or one film
- Written exam: 1 hour 30 minutes
- 50 marks • 25% of AS

Paper 3: Speaking individual research project and discussion of one sub-theme

- Oral exam: 12–14 minutes (including preparation time)
- 60 marks • 30% of AS

You will read and respond to a variety of French -language written texts, covering different contexts, registers, styles and genres. You will learn how to adapt your spoken and written French language appropriately for different situations and purposes. You will become more adept at using the French language accurately to express facts and ideas, and to present explanations, opinions and information in both speech and writing. Students will understand and apply the grammatical system and a range of structures of the French language with a high degree of accuracy and will be required to transfer meaning from French into English and/or vice versa. The Advanced GCE specification requires students to use the language in speech and in writing to present viewpoints, develop arguments, analyse and evaluate. We recommend that students follow the full two-year course to enable them to develop their language skills to their full potential.

What next?

This qualification supports progression into further and higher education, training or employment. It provides a suitable foundation for specialist linguists wishing to study French at a higher level, those wishing to combine language study with other disciplines at higher level, and those considering other qualifications without a language focus. Students will acquire knowledge, skills and understanding that will be of benefit to them in their life beyond Kendrick and which will equip them with the necessary tools to take their place in a multilingual global society.

FURTHER MATHEMATICS

AS and A Level

Assessment: Examinations (100%)

Exam Board: Edexcel

Subject specification code: AS Level – 8FMO A Level -9FMO

Subject specification:

<https://qualifications.pearson.com/content/dam/pdf/A%20Level/Mathematics/2017/specification-and-sample-assesment/a-level-l3-further-mathematics-specification.pdf>

What will I study?

Further Mathematics is a course suitable for students who would like to study a broader range of mathematical topics than those available in Mathematics A-level, and who wish to gain a greater depth of understanding of many aspects of mathematics.

To study Further Mathematics you will also need to study Mathematics, so Mathematics and Further Mathematics will be two of your subject choices.

Within the Further Mathematics course you may have some choice of which aspects of mathematics to study. Initially you will study complex numbers, matrices, further algebra and functions, further calculus, further vectors, polar coordinates, hyperbolic functions, differential equations, trigonometry and coordinate geometry.

For the remaining 50% of the content different options are available. These options will build on the applied content in A-level Mathematics.

AS Further Mathematics in Year 13

Every year we find that some students who initially opted to study Mathematics at the beginning of Year 12, decide that they would like to study extra mathematics in Year 13, so that they achieve an AS in Further Mathematics, as well as their full A-level Mathematics. We offer this as a partially taught course in Year 13, and it is appropriate for well-motivated able students. Part of the course will require independent study. This course will broaden the range of mathematical topics encountered. You will only need to make a decision at the end of Year 12 on whether or not to study this course.

If you are unsure about opting for A-level Further Mathematics, we recommend you choose A-level Mathematics in year 12 and then study AS Further Mathematics in year 13.

What next?

Studying Further Mathematics encourages the development of a thorough and deep understanding of mathematical processes, concepts and methods. It provides an excellent basis for the study of many mathematically based courses at university, and is particularly appropriate for those wishing to study Mathematics, Physics, Engineering or Economics at a prestigious university. It also prepares students for employment in highly mathematical disciplines that require knowledge and understanding of sophisticated mathematical ideas and techniques.

GEOGRAPHY

AS and A Level

Assessment: AS - Examinations (100%) A Level – Examination (80%) and Independent Investigation (20%)

Exam board: Edexcel

Subject Specific code: AS – 8GEO; A Level – 9GEO

Subject specification: <http://qualifications.pearson.com/en/qualifications/edexcel-a-levels/geography-2016.html>

What will I study?

Studying contemporary geography will enable you to better understand the world in which you are living; at its most basic level it looks at the relationship of human populations with each other, and with their physical environment. Geography A Level combines well with both arts and science subjects and provides the opportunity to develop your applied numeracy, and your essay/report writing skills – both of which are useful skills for all careers.

At AS the course will cover the following units:

- Tectonic Processes and Hazards
- Landscape Systems, Processes and Change – Coastal Landscapes and Change
- Globalisation
- Shaping Places – Diverse Places

At A Level the course will cover the four topics above and the following units:

- The Water Cycle and Water Insecurity
- The Carbon Cycle and Energy Security
- Superpowers
- Global Development and Connections – Health, Human Rights and Intervention.

The AS examination will include questions to test fieldwork skills; the A Level will examine these skills through an Independent Investigation of 3000-4000 words. Fieldwork is, therefore, an essential part of the course allowing you the opportunity to experience and investigate what you are learning about; you will take part in a number of fieldwork activities with 2 days required at AS and 4 days required at A Level.

All resources used in lessons, such as PowerPoints, class resources and notes, are shared digitally so that effective consolidation and revision can be done by revisiting lesson activities. Super-curricular activities such as the Royal Geographical Society essay competition and Climate Change conference are encouraged and supported by staff, and additional reading resources are highlighted to enable students to extend and enrich their learning where appropriate.

Geography lessons at Kendrick are varied and enjoyable; there is plenty of room for discussion and extended research which will help you become an independent thinker and learner and prepare you for life beyond the classroom.

What next?

Geography is an academic, versatile and very well respected A level which provides a strong grounding for almost any subject at university; this versatility is shown by the wide range of subjects that Geography students have gone on to study in recent years which include Geography, History, Law, PPE, Medicine, Veterinary Science, Engineering, Dentistry, Economics, English Literature, Biotechnology and Physiotherapy. The broad base and wide range of skills gained throughout the course has led to Geography at both A level and degree level being extremely highly valued by employers.

GERMAN

AS and A Level

Assessment: Examinations (100%)

Examination Board: AQA

Subject specification codes: AS – 7661 A Level – 7662

Subject specification: <http://www.aqa.org.uk/subjects/languages/as-and-a-level/german-7662>

Costs: Work Experience with **Halsbury Travel** (optional) ≈ £650

AS and A-level German themes and sub themes

Aspects of German-speaking society

- The changing state of the family
- The digital world
- Youth culture: fashion and trends, music, television

Multiculturalism in German-speaking society

- Immigration
- Integration
- Racism

Artistic culture in the German-speaking world

- Festivals and traditions
- Art and architecture
- Cultural life in Berlin, past and present

Aspects of political life in the German-speaking world

- German and the European Union
- Politics and youth
- German re-unification and its consequences

Assessments

AS

Paper 1: Listening, reading and writing (45% of AS)

- Written exam: 1 hour 45 minutes

Paper 2: Writing - essay on one text or film plus translation into German (25% of AS)

- Written exam: 1 hour 15 minutes

Paper 3: Speaking - discussion of two sub-themes (30% of AS)

- Oral exam: 12–14 minutes

A Level

Paper 1: Listening, reading and writing (50% of A-level)

- Written exam: 2 hours 30 minutes

Paper 2: Writing - two essays on two texts or one text and one film (20% of A-level)

- Written exam: 2 hours

Paper 3: Speaking individual research project and discussion of one sub-theme (30% of A-level)

- Oral exam: 21–23 minutes (including 5 minutes preparation time)

What will I study?

The Advanced level specification requires students to listen and respond to a variety of spoken German-language sources. You will read and respond to a variety of German-language written texts, covering different contexts, registers, styles and genres. You will learn how to adapt your spoken and written German language appropriately for different situations and purposes. You will become more adept at using the German language accurately to express facts and ideas, and to present explanations, opinions and information in both speech and writing. Students will understand and apply the grammatical system and a range of structures of the German language with a high degree of accuracy and will be required to transfer meaning from German into English and/or vice versa. In addition, students will acquire knowledge, skills and understanding that will be of benefit to them in their life beyond Kendrick and which will equip them with the necessary tools to take their place in a multilingual global society. We recommend that students follow the full two-year course to enable them to develop their language skills to their full potential.

What's next?

This qualification supports progression into further and higher education, training or employment. It provides a suitable foundation for specialist linguists wishing to study German at a higher level, those wishing to combine language study with other disciplines at higher level, and those considering other qualifications without a language focus.

HISTORY

Board: OCR

AS assessment: two exams, each worth 50% of the AS Level, each 1 hour 30 minutes long

A Level assessment: Unit 1 - examination, 25% of A Level, 1 hour 30 minutes long
Unit 2 - examination, 15% of A Level, 1 hour long
Unit 3 - examination, 40% of A Level, 2 hours 30 minutes long
Unit 4 – coursework, 20% of A Level: one essay of 3000-4000 words.

Subject specification codes: A Level: H505; AS Level: H105

Subject specification: <https://www.ocr.org.uk/qualifications/as-and-a-level/history-a-h105-h505-from-2015/>

“To be ignorant of the past is to remain a child” – Cicero

What will I study?

History forms an important part of education in general and it is often claimed that an awareness of the past makes one better informed for the present. Studying History in the Sixth Form allows students to examine historical periods in greater depth than in previous years, enabling them to debate controversial topics in more detail than at GCSE level. History is a consistently popular subject in the Sixth Form at Kendrick. Most students complete the full A Level qualification. Each year, a number of students go on to study History at university, including Oxbridge.

The course

The A Level course, similarly to the current GCSE syllabus, mostly focuses on modern history, but studies societies which are new to students to present a fresh challenge. The course includes sections of essay-writing; analysis and evaluation of contemporary source material and historians’ interpretations, building on skills introduced in earlier years. We teach the A Level syllabus offered by the OCR exam board and are likely to teach the options outlined below.

Two units will be studied by both A Level and AS Level students:

- Modern Britain, 1930-1997, including a source-based study of Winston Churchill, 1930-51
- The French Revolution and the rule of Napoleon Bonaparte, 1774-1815

Two additional units will be studied by A Level students only:

- Russia and its Rulers, 1855-1964
- A coursework essay of 3000-4000 words, worth 20% of the qualification, where students will have some choice of topic

What next?

- History retains its status as a very well respected qualification by universities and employers. The academic nature of the subject means that universities value History highly when offering places to students on a wide range of courses. History is frequently studied in combination with certain subjects such as English and Geography, where similar skills in reading, analytical thinking and writing are developed. History is also studied by students aiming to apply for medical courses who wish to show that their skills and interests extend beyond the sciences.
- As an academic and respected A Level option, History allows students a large degree of choice about potential career paths, and the skills of analytical thinking and writing which it develops are highly valued by employers. Careers for History students commonly include law, journalism, civil service, politics, heritage (museums, galleries, etc.), academic research, genealogy (family history) and education.

LATIN

Examination Board: OCR

Subject specification codes: A Level – H443; AS – OCR HO43

Subject specification: <http://www.ocr.org.uk/qualifications/as-a-level-gce-latin-h043-h443-from-2016/>

Assessment:

Assessment is through examinations at the end of the second year of study (A Level) or at the end of the first year (AS), testing knowledge of language and literature through a combination of translation, comprehension and responses to prepared literature. The exams are as follows:

A Level Examinations

Unseen Translation (01) – 33% of the total

Comprehension (02) – 17% of the total A Level

Prose Literature (03) – 25% of the total A Level

Verse Literature (04) – 25% of the total A Level

AS Examinations

AS Level Language (01) – 50% of the total AS

Literature (02) – 50% of the total AS

What will I study?

This course will help you to acquire understanding of the history and culture of the Classical World, whilst studying the language and literature of Ancient Rome and her empire.

For the A Level: Language work accounts for 50% of the total A Level, in which students study grammatical and syntactical structures, a range of prose authors and a verse author to develop their linguistic competence. Study of literature accounts for the remaining 50% of the A Level. For this latter element, students study two prose and two verse texts in Latin, as well as some further material in English translation to develop knowledge and understanding of the literary context of the set texts.

For the AS: The language component develops linguistic competence through the study of grammatical and syntactical constructions, and through studying a range of prose authors. The literature component requires the study of one prose and one verse text. Students also develop a familiarity with the literary context of these texts.

Teaching time is split between the study of the prescribed texts, including looking at the literary context of each one, and language work.

What next?

Latin is a useful qualification for those interested in the study of Classics, Ancient History, Classical Civilisation, Law, Medicine, History and a variety of other degree programmes. It also supports study of Modern Foreign Languages.

A Classics degree has a high rate of employment success and is popular with employers because it develops skills of independent, critical thinking; analysis and evaluation; and communication. The career opportunities are very wide but could include: academic or other fields of research, the legal profession, journalism, business and management.

MATHEMATICS

AS and A Level

Assessment: Examinations (100%)

Exam Board: Edexcel **AS Level** – Mathematics (8MAO); **A Level** –Mathematics (9MAO)

Subject specification: <https://qualifications.pearson.com/en/qualifications/edexcel-a-levels/mathematics-2017.html>

What will I study?

The study of Mathematics will develop your understanding of mathematics and mathematical processes in a way that promotes confidence and fosters enjoyment. You will extend your range of mathematical skills and techniques, and use them in increasingly more demanding situations. You will learn to use mathematics as an effective means of communication, and develop an awareness of the relevance of mathematics to other fields of study, to the world of work and society in general. You will use your mathematical knowledge to make logical and reasoned decisions in solving problems both in pure mathematics and in a variety of contexts, and communicate the mathematical rationale for these decisions clearly.

Your course will contain both pure and applied mathematics. The applied content for both AS and A level mathematics is drawn from statistics and mechanics. Pure mathematics includes algebra and functions, coordinate geometry, sequences and series, trigonometry, exponential functions, logarithms, differentiation and integration. Applied mathematics includes vectors, kinematics, forces, Newton's laws, statistical sampling, data presentation and interpretation, probability, statistical distributions and statistical hypothesis testing

Overarching themes of mathematical argument, language and proof, problem solving and mathematical modelling underpin all parts of the qualifications. The use of technology in the classroom is encouraged so a large data set will be provided for you to analyse as part of the AS and A level Mathematics specifications. Ability to use algebra is fundamental to all aspects of mathematics and you will develop your algebraic skills throughout.

Your numeracy skills are expected to be good and will be developed during the course. You will be encouraged to develop efficient and effective use of a calculator. A suitable calculator will be recommended for use in lessons and in the examination and will be available for purchase through school at a reasonable price.

What next?

Mathematics develops skills of logical, analytical reasoning that are valued in many careers and many degree courses. In fact many degree courses require Mathematics A-level, and even more will have some mathematical content, so the more mathematics that you study prior to university, the better prepared you will be. Careers and courses that specifically include mathematics include Mathematics itself, Physics and any Science based course, Engineering, Medicine, Architecture, Economics, Finance, Computing and Aeronautics. Nearly all research will require some form of statistical analysis, so a basic understanding of statistical concepts and processes will be valuable in a huge range of areas, including Psychology, Sociology, Geography, Geology, Biology and Forensics. Even if you choose a career path that does not specifically involve much mathematics, by studying Mathematics A-level you will have developed very valuable transferable skills.

MUSIC

A Level only

Assessment: Performance (30%), Composition and Technical Study (30%), Written exam (40%)

Exam Board: Edexcel

Subject specification codes: A Level – 9MU0

Subject specification: [Edexcel A level Music \(2016\) | Pearson qualifications](#)

What will I study?

Music is ideal for students wanting to study a different type of subject, yet one which is rigorously academic and is respected by academia. This course will provide you with a thorough grounding in the three main musical disciplines of performing, composing, and listening and understanding. You will develop performance skills (solo and/or ensemble), compose music and learn about 4-part counterpoint (the basics in Year 12 and stylistic studies in Year 13), at the same time building up your aural and analytical skills by studying extracts from the Anthology of Music. Throughout the course, students will be developing links between Music and other subjects, such as languages and Humanities, as well as Maths and the Sciences.

In Year 12 you will work on elements of performance practice, learn to compose and arrange music and understand harmony and how different composers compose. Furthermore, you will learn how to analyse music through listening to and studying scores of set works and associated wider listening, identifying their musical features, and about the social and historical contexts of compositions. Additionally, you will research careers in Music and related areas, as well as how the conservatoire and university application process is completed.

In Year 13, you will develop your performance skills further to produce a recital and specialise in a technical study and composing skills. You will also develop your knowledge and understanding of music from periods in history through analysing more complex set works, and learning how to compare and contrast extracts, how to critically evaluate them, how to contextualise music, and identify tonal features.

Music students are expected to participate in extra-curricular activities and very often run ensembles. There will be opportunities to attend concerts and theatre trips. The ability to read at least one clef (treble or bass) is essential.

What next?

By studying Music, you will also be developing your skills in the areas of planning and organisation, communication and confidence, teamwork and independence, analysis and research, all of which prepare you for life after Kendrick.

A Level Music gives a secure foundation for students wishing to pursue Music at degree level, whether at university or conservatoire. A vast majority of those that study Music go on to study it at prestigious conservatoires and universities each year.

PHILOSOPHY

A level

Assessment: Examinations (100%)

Exam Board: AQA

Subject specification code: A Level – 7172.

Subject specification: [AQA | Philosophy | A-level | Philosophy](#)

“The only true wisdom is to know that you know nothing” - **Socrates**

What will I study?

Philosophy is the oldest academic discipline. The study of Philosophy dates back to ancient Greece and the ideas that have evolved from those early times have influenced and underpinned our changing perceptions of reality, scientific discovery, political thought and ethical dilemmas. They continue to do so with great vigour. Philosophy feeds into all academic subjects as a method of exploring truth, fallacy and meaning.

The kinds of questions philosophers ask are:

- What can we know?
- Are mind and body distinct?
- Does science ever discover truths?
- What does it mean to be immoral
- Can we prove God exists?
- Is meaning subjective?

Students taking Philosophy will study logic and its methods. They will discover that Philosophy is very careful and systematic about the claims it makes. Philosophers are cautious, but critical in their thinking. Students taking Philosophy will notice their ability to reason effectively will increase as they become more skilled in philosophical methods.

This course provides a rich and varied entry into the study of Philosophy.

There are two three hour written exams for the A Level qualification, each worth 50% of the A Level qualification.

Y1	Ethics	Y2:	Metaphysics of Mind:
Epistemology [The study of knowledge]:	<ul style="list-style-type: none">• Utilitarianism• Kantian Ethics• Aristotelian Ethics	Metaphysics of Religion:	<ul style="list-style-type: none">• What do we mean by mind?• Dualist Theories• Physicalist Theories• Functionalism
<ul style="list-style-type: none">• What is knowledge• Perception as a source of knowledge• Reason as a source of knowledge• Limitations of Knowledge		<ul style="list-style-type: none">• The Nature of God• Arguments for God's Existence• Religious Language	

What next?

At degree level Philosophy combines well with many courses including Maths, English, all the sciences, just about anything in fact. Philosophy is a highly respected academic course of study and many degrees will incorporate some elements of philosophical analysis in both the arts and the sciences.

All Russell Group universities have excellent Philosophy departments and many have had such since their foundation.

In its first statement in 1827, UCL wrote: "*As the Physical Sciences aim at ascertaining the most general facts observed by sense in the things which are the object of thought, so the Mental Sciences seek to determine the most general facts relating to thought or feeling, which are made known to the being who thinks by his own consciousness*".

PHYSICAL EDUCATION (PE)

A Level

Assessment: 30% Practical performance in physical activity and sport, 70% Examination

Exam board: OCR

Subject specification codes: AS – H155; A Level – H555

Subject specification: <https://ocr.org.uk/qualifications/as-and-a-level/physical-education-h155-h555-from-2016/>

What will I study?

Physiological factors affecting performance (01)*

2 hour written paper, 90 marks

30% of total A level

- Applied anatomy and physiology
- Exercise physiology
- Biomechanics

Psychological factors affecting performance (02)*

1 hour written paper, 60 marks

20 % of total A level

- Skill acquisition
- Sports psychology

Socio-cultural issues in physical activity and sport (03)*

1 hour written paper, 60 marks

20% of total A level

- Sport and society
- Contemporary issues in physical activity and sport

Performance in physical education (04)*

Non-exam assessment (NEA) 60 marks**

30% of total A level

- Performance or Coaching
- Evaluation and Analysis of Performance for Improvement (EAPI)

What next?

- Many universities offer Sport related courses including:
 - Sport and exercise science, Sport business management, Sports Engineering, Sport and exercise psychology, Sport Technology, Sport Journalism, Sports Injury, Sport Science and Exercise practice, Physical education and Coaching, Sport development with coaching, Applied sport science and Sport studies.

This A level course is also very well accepted and useful when applying for physiotherapy or medicine.

PHYSICS

AS and A Level

Edexcel AS: 8PH0 A Level: 9PH0

Assessment: AS: Core Physics I: 8PH0/01 50%, Core Physics II: 8PHP/02 50%

A Level: Advanced Physics I: 9PHO/01 30%, Advanced Physics: 2 9PHO/02 30%,

General and Practical principles in Physics: 9PHO/03 40%

Science Practical Endorsement: Students complete Core Practicals within the course to cover this.

Exam Board: Pearson Edexcel

Subject specification codes: AS: 8PH0, **A Level:** 9PH0

Subject specification: <https://qualifications.pearson.com/en/qualifications/edexcel-a-levels/physics-2015.html>

AS & A-Level

The Physics department aims to introduce students to the wonders of the natural world from the very small to the very large, from everyday phenomena to the exotic, from simple to complex. The aim is to make this world more accessible and understood and to allow students to enjoy the experiments, expand their thinking, and be amazed at how the laws of physics make the physical world behave. We aim to help students to realise that 'Physics is Fun' rather than the popular perception that Physics is hard. A-Level Physics is suitable for students who have followed a GCSE Double Award course or a GCSE Separate Science Physics course.

The word 'physics' means 'nature' and thus physics, in the original sense of the word, means study of nature and the world in which we live. Physics thus occupies a central position in science and is concerned with the whole range of natural phenomena from the study of sub-nuclear particles to the structure of the universe. In addition, the wide practical applications of Physics mean that it has immediate relevance to modern technological developments. The Physicist thus has a vital role to play in extending our knowledge of nature and in helping to develop our technology further.

Costs: Students will be provided with one general Advanced level textbook. It will be recommended that students purchase a textbook written for the new specification – they will be advised on which will be most useful.

What will I study?

Year 12 AS: Mechanics, Electric Circuits, Materials, Waves and Particle Nature of Light, Experimental Physics

Year 13: Electric & Magnetic fields, Further Mechanics, Particle Physics, Thermal Physics, Nuclear Physics, Cosmology, Experimental Physics.

Experimental Physics is embedded in the course, with Core Practicals at regular intervals. These are used as the basis for written questions on experimental work in paper 3 at A Level.

It is advantageous to take AS or A Level Maths.

What next?

Physics is an exciting, challenging subject and the topics offered in Physics provide an ideal training for your future. The ideas and techniques developed during your study of Physics will be invaluable in a wide variety of degrees, including Medicine and Engineering. Physics is considered a good 'thinking' subject and is well respected as an entry qualification for many careers.

SOCIOLOGY

AS and A Level

Assessment: Examinations (100%)

Exam board: AQA

Subject specification code: AS – 7191; A Level - 7192

Subject specification: [AS and A-level Sociology Specifications for first teaching in 2015 \(aqa.org.uk\)](https://www.aqa.org.uk/subjects/sociology/AS-and-A-level/Sociology-Specifications-for-first-teaching-in-2015)

What will I study?

Sociology is the study of society. Taking this subject gives students a chance to explore something different to reflect a new phase in their education. It is one of the social sciences (subjects focusing on human behaviour). Professional sociologists are often interviewed in the news to explain riots, the rise in a particular type of crime or whether changing the benefit system could encourage more couples to get married. They might offer a view about whether media violence affects children or why certain groups perform badly at school. Sociologists perform a useful function because they have studied issues thoroughly by observing or interviewing people or using similar methods. All these topics are part of the **AQA AS/2** courses, so potentially our students could also become expert sociologists interviewed on television or consulted by a government deciding how to address a pressing social issue.

For Year 1 students study:

- Education
- Families and Households
- Research Methods

For Year 2 students study:

- Theory and Methods
- Crime and Deviance
- Media

Many students with other ambitions take Sociology to widen their horizons. We are all intrigued by issues such as why men and women often act so differently and whether it is possible to reduce global inequalities. Sociologists disagree amongst themselves as there are no easy answers, so in the lessons we spend a lot of time in lively discussions.

What Next?

Whilst many students go on to study Social Sciences and Humanities such as Sociology, Psychology, PPE, Criminology, Law, History and English, this course provides a strong grounding for those wishing to pursue many other subject areas at degree level.

EXTENDED PROJECT QUALIFICATION (AQA)

This subject is currently offered as an enrichment subject in Year 13.

Examination Board: AQA

Subject specification code: Level 3 Extended Project Qualification (7993)

Subject specification: <http://www.aqa.org.uk/subjects/projects/aqa-certificate/EPQ-7993>

Assessment:

Equivalent to half an A Level, A* worth 70 UCAS points

Assessment is through the candidate completing a Production Log of the process which leads them to produce a 5000 word essay, or artefact (plus 1000 word supporting report) and presentation.

There are 4 assessment objectives:

AO1: Planning

AO2: Use of Resources

AO3: Develop and realise

AO4: Review

Students will also be expected to attend a series of sessions in which key skills are taught, which inform and then enable students to access the get the most out of their commitment and to achieve the highest grades that this qualification offers.

Timeline

Currently, students commence their EPQ in April/May of Year 12 and complete it by February 'Half Term' (End of Term 3) in Year 13.

A commitment of approximately 10 months/90 hours (20 teaching, 30 researching, 20 analysing, 10 write-up, 10 presentation/exhibition).

Marking and moderation

The work is assessed as 100% coursework, with no examination.

The EPQ is first marked by the supervisor who has worked closely with the student. Then the marking is validated internally by the other supervisors and/or the EPQ co-ordinator. Finally a sample of projects will be moderated externally by the AQA moderation team.

Usefulness to university applications and higher education

Helps to build the skills "disconnect" between A Levels and degrees.

Learners at university are expected to learn:

- independently
- by researching
- with a capacity for critical thinking
- through synthesise and by making connections
- by planning well and delivering longer project work to a schedule
- by presenting outcomes appropriately and persuasively

The skills imparted to EPQ students help significantly with the above skill-set requirements.

Not all universities will recognise the EPQ as part of their offer requirement, but there is the trend that more are doing so. Some admissions teams reduce the grade-offer for a specified subject by a grade if an EPQ grade A is achieved. However, universities which may not take into account the EPQ with regard to

their grade offers may well still be more interested in students who reveal a deep and genuine passion for a subject, and the EPQ can be such a vehicle.

What will I study and learn?

<p>Taught skills required, including:</p> <ul style="list-style-type: none">• Effective research• Critical analysis of resources• Referencing• Plagiarism avoidance• Planning• Report writing• Time Management• Presentation skills• Other skills as necessary (e.g. Film making)	<p>Other aspects:</p> <ul style="list-style-type: none">• Choosing a topic that will hold your interest• Planning (for lots of different stages)• Researching• Analysing• Writing a report or essay• Giving a presentation• Setting up an exhibition• Reflection and evaluation
---	--

Breadth of scope for students

Some example of titles chosen by previous students.

Artefact: 'An informative, yet humorous, comic on the first act of 'Hamlet' aimed at young adults.'

Essay: 'What are the social and ethical implications of mitochondrial gene transfer therapy?'

Essay: 'To what extent is Milton Keynes a sustainable community?'

Essay: 'Should new law be implemented concerning the nationality of children born on the Mars One base?'
