

Eleanor Reeves

Eleanor is a former student of Kendrick School who went on to study Law at University College London. She is now a Senior Associate Lawyer in the Environment and Natural Resources practice for multinational law firm Dentons, specialising in environmental and health & safety law. She regularly advises clients in the waste, oil and gas (upstream and downstream), utilities, insurance and retail sectors.

Eleanor's main areas of focus include:

- Liability risk management including drafting contractual protection, negotiating with regulators in relation to enforcement positions and pursuing legal challenges where necessary.
- Day-to-day compliance matters such as obtaining operational consents and permits and interpreting regulatory obligations.
- Incident response and crisis management.
- Regulatory barriers and incentive/encouragement mechanisms.

Her practice area includes pollution liability regimes, sustainable development, land remediation, natural resources, renewable energy, international climate change mechanisms, health and safety regimes, REACH, product liability, nuclear, water and drainage, private law claims, habitat protection, and producer responsibility and waste management.
