

Kendrick School

Science Goggles/Glasses

All students are expected to have eye protection for all science lessons. We offer two types of eye protection:

Science Goggles – cost £2.00

These goggles have an elasticated headband which offers more protection against splashes etc. They are often more comfortable for students who wear spectacles. They should be kept in a bag or sock and should not be bent or placed in the bottom of a bag to prevent scratching and breaking.

Science Spectacles – cost £2.00

These are a plastic slip-on spectacles which some students find more comfortable. These offer slightly less protection against chemical splashes. They are best kept in a small bag or sock to prevent scratching and should not be bent or placed in the bottom of a bag.

Both types of eye protection are considered suitable for school science.

Please order the goggles/glasses through ParentPay individually or as part of the Curriculum Pack.

All students are expected to wear eye protection and laboratory coats in all science lessons. If they come to a lesson without adequate protection they may not be able to do the practical work on health and safety grounds, and may be asked to stay at a break or after school to make up the work missed.
